

KARTHIKEYAN R V

SOFTWARE ENGINEER (SDE II)

Hyderabad, India | karthikeyan.r.v.2601@gmail.com | +918754800998 | <https://www.linkedin.com/in/karthikeyan-rv/> | [Github](#)

Professional Summary

Software Engineer (SDE II) with ~3.5+ years of full time experience building scalable enterprise applications at Oracle, powering systems used by 40K+ hotels globally. Experienced in microservices, Java-based backend architectures, and full-stack development with React and TypeScript. Focused on performance, reliability, and clean system design, with recent work in AI-driven automation using Python and LLM-based workflows.

SKILLS & CERTIFICATIONS

Java, Spring Boot, Angular, TypeScript, JavaScript, HTML5, CSS3, Full-Stack Development, REST APIs, API Integration, Microservices Architecture, Distributed Systems, Event-Driven Architecture, RabbitMQ, Kafka, Azure Service Bus, Messaging Systems, BPMN Workflows, Logging Frameworks, Telemetry, Microsoft Azure, Cloud Platforms, CI/CD, Jenkins, GitHub Actions, Docker, Kubernetes, DevOps, Agile, Scrum, Test-Driven Development, Automated Testing, Selenium, Cypress, Debugging, Performance Optimization, Code Review, Software Development Lifecycle, System Design, Design Patterns, OOP, OOAD, Observability, Reliability Engineering, SQL, PostgreSQL, MongoDB, Data Modeling, Domain Modeling, Data Processing, Scalable System Design, Linux, Git, Authentication, JWT, OAuth2, RBAC, API Security, Secure Coding, LangChain, OpenAI API, RAG, FAISS, Embeddings, Semantic Search, Prompt Engineering, GenAI Applications

[OCI 2025 AI Foundations Associate](#), [OCI 2025 Certified Generative AI Professional](#).

PROFESSIONAL EXPERIENCE

ORACLE | HOSPITALITY GLOBAL BUSINESS UNIT

Contributed Projects : [Cloud PMS - OPERA Cloud as framework developer - Hospitality Global Business Unit](#)

Software Engineer II

(Hyderabad, India) September 2024 – Present

- Delivered **20+ production features** for OPERA Cloud (40K+ hotels); built **reusable UI components & page-template framework** (8+ modules), reducing **development effort by ~25%**.
- Developed **REST APIs** in microservices architecture; improved **API response times by ~15%** and ensured **high scalability & reliability**.
- Implemented **i18n localization** and **cross-browser compatibility**, increasing **global usability coverage across 10+ regions**
- Applied **SOLID principles** & design patterns; contributed to **scalable system design** and mentored interns, improving **code quality and onboarding efficiency**.
- Built **AI agent workflows** using Python & LLMs, reducing **manual effort in internal processes by ~30%**.

Software Engineer I

(Hyderabad, India) September 2022 – August 2024

- Built **full-stack features** (React, TypeScript, Java, REST APIs); improved **user experience and reduced UI latency by ~20%**
- Developed **microservices** using Java & Spring, supporting **scalable services handling high concurrent usage**.
- Optimized **SQL queries, state management & APIs**, improving **data retrieval performance by ~25%**.
- Contributed to **code reviews, testing & CI/CD** (Jenkins, Git); reduced **production defects and improved deployment stability**.

Project Intern

(Hyderabad, India) February 2022 – August 2022

- Audited **10+ microservices** and performed **bulk version upgrades**, ensuring stable and compliant deployments.
- Supported **feature development, API integration, and debugging** in a microservices architecture.
- Built **Cypress and Jest test suites** and automated **Jira workflows using Python**, improving efficiency.

APPSCMS TECHNOLOGIES

Contributed Projects: [Online Video, Audio & PDF Editor](#)

Web developer Intern

(Remote) February 2021 – July 2021

- Developed **browser-based media tools** with **20+ features** using FFmpeg (WASM) & PDF libraries.
- Optimized **client-side processing for large files**, reducing **processing time by ~30%** and improving **UI responsiveness**.

EDUCATION

AMRITA VISHWA VIDYAPEETHAM

Coimbatore, Tamil Nadu, India

B.Tech in Computer Science and Engineering | CGPA: 8.43/10

June 2022

Completed 12+ core CS courses, including Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, and Object-Oriented Programming, with strong performance across all.

- Finalist, Atlassian App Dev Hackathon (Top 10 of 2000+ teams) & AIR 819 in AEEE, secured 90% scholarship.

PROJECTS

[Vortex AI](#) – RAG chatbot for PDF querying | LangChain, OpenAI, FAISS, LLM, Python

[Policy Compliance System](#) – RBAC platform with versioning & tracking | Workflow, Notifications, APIs, PERN

[Order Management System](#) – Full-stack order & inventory app | PostgreSQL, Express, React, Node.js
